

REMOTE CONTROL

①	ON/OFF	Turn the product on and off
②	MULTI-WHITE SELECTORS	Select from cool, soft, or warm white
③	MULTI-COLOR SELECTORS	Change the color to match your mood
④	FLASH	Flash color-changing mode
⑤	STROBE	Strobe color-changing mode
⑥	FADE	Fade color-changing mode
⑦	SMOOTH	Smooth color-changing mode
⑧	RESET	Reset to default settings
⑨	DIMMER BUTTONS	Adjust the brightness/Speed

IR REMOTE OPERATION

Battery Installation:

- The battery compartment is located on the back side of the remote control, press the release tab inwards and remove the battery door.
- Insert the two AAA batteries (not included) making sure to match the (+) and (-) polarity inside the compartment.
- Place the battery door back so it locks in place.

Operation:

- Turn on the LED Light by pushing the ON button on the remote control.
- Select the desired color or the desired mode by pushing the corresponding button on the remote control.
- Use the increase/decrease buttons to adjust the desired brightness of a selected color or speed of the color changing modes.
- Push the OFF button to turn off the LED Light.

NOTE: For best results, the remote should be pointed at the IR receiver located at the beginning of the two light strips.

BATTERY CAUTIONS

Note: this product’s remote control uses 2 x AAA batteries.

- To prevent battery leakage damage, remove the batteries when drained or if the product will not be used for an extended period.
- In the event of leakage, take care not to touch the chemicals from inside the batteries. Wash immediately to remove if internal chemicals contact with skin, clothes, or other materials. In the case of an emergency if chemicals get into the eye, wash immediately with plenty of water and get medical treatment from a doctor.
- When installing batteries, make sure to align the +/- polarity direction correctly.
- Replaced used batteries at the same time.
- Do not mix old and new, or different types of batteries.
- Do not attempt to charge batteries.
- Dispose of used batteries following your local regulations.

SAFETY AND CARE

Read all the instructions before using the product and then store them for future reference.

- Keep these instructions.
- Use the product with the provided power adapter only.
- The product is not water resistant. Use in a dry location. Do not expose to rain, moisture, or other liquids, and do not use near water such a swimming pools, bathtubs, or sinks.
- Do not expose the product to heat sources, the sun, or leave in a hot vehicle. Do not dispose of in a fire or subject to temperatures above 150 degrees Fahrenheit.
- Keep the product away from corrosive chemicals, liquids, or other materials that could pose a risk of danger.
- Do not drop, puncture, or use if use if damaged or modified.
- Do not modify or try to use for a non-intended purpose.
- Do not attempt to repair the device or open the unit as this will void the warranty.
- Do not use the product in a strong magnetic field.
- Use a clean and soft cloth to clean. Do not use abrasive cleaning solvents to clean the unit.
- This is not a toy. Do not allow children to install the strip light.

WARRANTY

All Willow + Rose products carry one year limited warranty from date of purchase. Visit willow-rosehome.com for warranty details and instructions.

FCC STATEMENT

This device complies with Part 15 of the FCC Rules, operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

25’ RGB Color LED Light Strip

WR-LSC1202

USER MANUAL

WHAT’S INCLUDED

- 25ft Light Strip
- 1x 5V/1A USB Power Adapter
- 1x Remote Control
- 2x Flexible Connectors for Corners and Gaps
- 1x Cable Organizer Mounting Clip for Securing Control Module
- 1 Set of Mounting Clips and Screws
- 1x User Manual

INSTALLATION

1. Determine where you will install the LED Strip. Make sure the location is close enough to a power source. Ensure that the mounting surface is smooth and clean. Clean the mounting surface with a clean cloth and rubbing alcohol to remove any dust or oils that will weaken the adhesive. Be sure to let this surface dry before installation. Before cleaning the surface with rubbing alcohol, test on an inconspicuous location to ensure no damage to the wall.
2. When unravelling the spool keep it connector close to where you will need to connect it to the power source.
3. Peel beginning of adhesive backing off and firmly stick LED Light onto the mounting surface (be careful to peel off only the backing and not the adhesive)
4. Peel off more of the adhesive backing as you mount the strip, pressing and holding each section firmly against the surface for at least 10 seconds.
5. Connect the USB end of the LED strip to the (included) 5V USB adapter. Then plug the power adapter into a power outlet.

INSTALLATION NOTES

1. For best mounting results, place adhesive onto desired surface with ONE attempt. Reapplying multiple times will not guarantee secure mounting onto surface.
2. Make sure the desired location is close enough to a power source like a wall outlet for your power adapter (included).
3. For optimal performance, place IR receiver in a location away from the IR receiver on the TV to avoid interference from the TV remote control signal.
4. For back-lighting corners, avoid creating any tight bends in the LED strip as this may damage the LEDs.
5. You cannot connect additional light strips to this product.
6. You can secure the controller to the wall with the included cable organizer mounting clip. Attach the clip side onto the cable near the controller. Remove the adhesive backing from the back of the clip and stick to wall in desired location.

CUT & CUSTOMIZE INSTRUCTIONS (OPTIONAL)

For professional looking corners, you can cut the light strip to shorter lengths by cutting on the line specified below and reattach using the provided connectors. NOTE: Never cut product while it is plugged into a power source.

First measure the strip and surface of application to determine where you will need to cut. Cut the light strip in determined location, making sure to cut along the line specified below.

Open the tabs of both ends of the connectors. Insert each end of the strip from the cuts made in step 1.

Securely close tabs and procede with installation.

INSTALLATION CARE

- Do not pull the strip or power supply wire hard during installation.
- Be cautious of static electricity during installation and usage.
- Avoid pressing on or bending the LED chips or other strip components when installing the lighting strip.
- When bending the strip lights during installation, avoid folding the LED components as it may affect the product’s life span.
- Keep the product away from sharp objects.
- To avoid short circuit damage, remove nails, metal, or other conductive objects from the installation surface before attaching the light strip light.
- Do not light up the strip when it is rolled up. Fully unspool the strip before operation to avoid damage to the lighting or to other property.

CAUTION

Adhesion of this product with the attached double-sided tape provides a strong bond to many surfaces. If the product is removed after installation, there is the possibility that damage may occur to the surface and to the product itself. This damage may include residue, stains, or other physical damage. The included double-sided tape can only be used once and cannot be reused.

The manufacturer is not liable for any damage that may occur during the installation or removal of this product. Physical damage to the product will void any warranty.

SPECIFICATIONS:

24.5ft LED Strip + 3.6” Wiring (Note: Wiring size may vary)
Power Adapter Output: 5V 1A
